

INTRODUCE YOURSELF WITH BOOTSTRAP

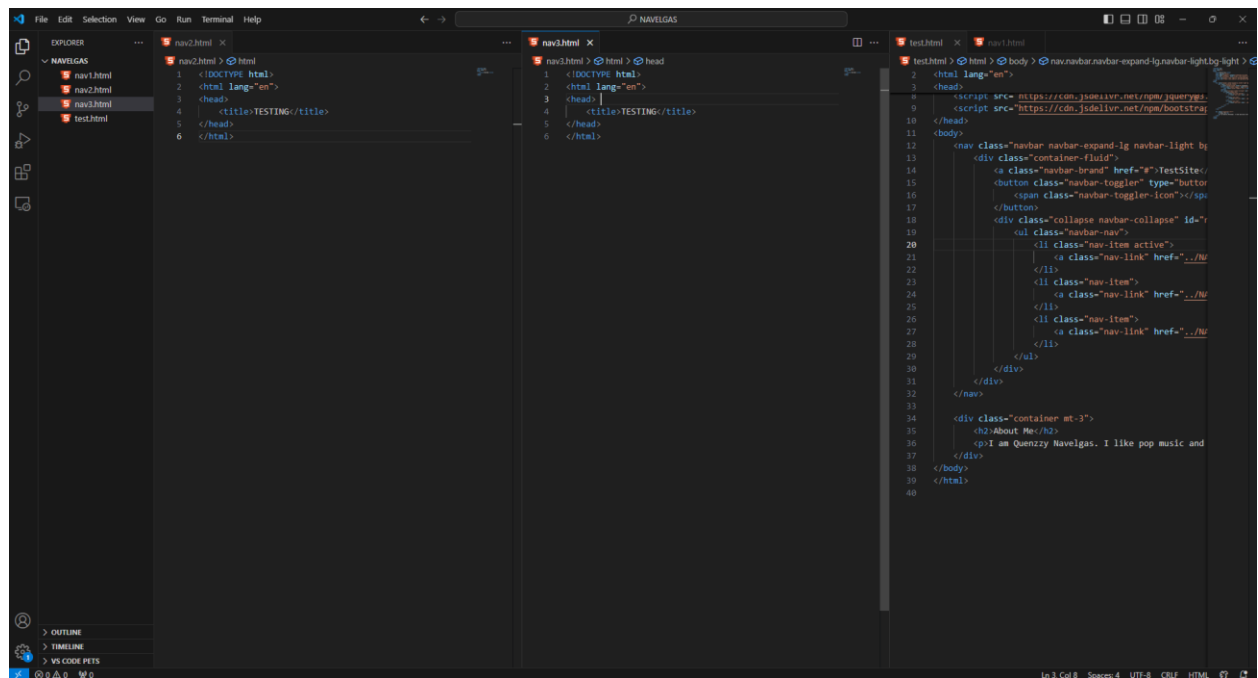

INSTRUCTIONS:

- Copy first the Bootstrap starter template from Bootstrap's official website. You have the freedom to choose the version, but I strongly recommend using the version 4.6.
- Your goal for this activity is to **utilize the Bootstrap concepts** you learned from the last lecture. You must create a website where the viewers can get to know about you.
- You have to incorporate the **NAVBAR COMPONENT** as shown on the link below. Include at least **3-5 pages** in the website.
 - <https://getbootstrap.com/docs/4.6/components/navbar/>
- Please **DO NOT DOWNLOAD** premade **bootstrap templates**, we'll get there next week. We have to write the Bootstrap template **FROM SCRATCH**.
- Please **DON'T INCLUDE** your full name (your nickname is fine) or other **PERSONAL DETAILS** like birthday, address, location.
- The Bootstrap website you'll create is instead more focused about your favorite music, dream places to live in, goals, aspirations, hobbies in life, items you may list on your bucket list, **or anything else** you can describe about yourself **without specifying your personal details**.
- Deploy the site using **Github pages**. Please **MAKE SURE** the link is **working** before submitting the document.
 - Here's a guide on how to deploy:
 - <https://docs.google.com/document/d/1IYSZFa4uhbNZPPIASRq5VwUzWfYayaG96o8uVSKQB4/edit?usp=sharing>

PROGRESS REPORT (AS OF JANUARY 25, 2025)

PASTE 3-5 PICTURES OF WHAT YOU DID SO FROM OUR ONSITE MEETING
